

What is Cloud Computing?

- ✓ Cooperation among governments
- ✓ Collaborative, shared technology
- ✓ Technology leveraged for mutual benefit
- ✓ Economies of scale
- ✓ Pooling resources
- ✓ On-demand consumption of technology
- ✓ Improved government services
- ✓ A sustainable model for digital government

Benefits

- Lower capital costs
- Contained operating costs
- Web-based accessibility
- Use and pay for only what is needed
- Faster provisioning
- Scalable & resilient
- Better customer service

Build it Once, Pay for it Once, and Everybody Benefits.

Oakland County's Cloud Computing Strategy

- Focusing on SaaS (Software as a Service)
- Sharing technology with other governments through **G2G Cloud Solutions**
- Facilitating solution procurement for other governments through **G2G Marketplace**
- Partnering with vetted third-party vendors of proven solutions
- Readiness assessments and infrastructure expansion

“Cloud computing will create opportunities for state, county, and local governments to collaborate and to lower the cost of using and owning technology. This is the ultimate in shared services.”

– Oakland County Executive L. Brooks Patterson
