Information Technology 2019/2020

Master Plan Quarterly Status Executive Summary

Prepared by
Oakland County Department of Information Technology
Project Management Office

October 16, 2020

1.0 INTRODUCTION

The Information Technology Master Plan Quarterly Status Executive Summary provides an overview of the services and hours provided by IT during the 2019/2020 Master Plan period.

This document does not replace other reports provided to the Board of Commissioners, including the Information Technology Strategic Plan, IT Master Plan, and IT Master Plan Quarterly Status Report. In addition, information regarding Information Technology's current financial status can be obtained from the Department of Management and Budget's Fiscal Year 2019/2020 Financial Forecast and Budget Amendments Report.

2.0 INFORMATION TECHNOLOGY OVERVIEW

The Department of Information Technology is a service bureau that provides IT services to 82 County Divisions, more than 100 local governmental units (assessors, treasurers, law enforcement, etc.), over 50 private sector customers, and over 1,700 Access Oakland Property Gateway customers. IT is responsible for over 150 major applications consisting of more than 8,000 programs and provides systems support, maintenance, enhancements, and new development for all major systems applications. IT's Project Management System contains actual hours worked for the following divisions: Application Services, Technical System & Networking, CLEMIS, and Internal Services.

The vision of the Information Technology Department is to be a leader in providing government services. The following Information Technology guiding principles have been developed, and are intended to provide a high-level direction for the entire organization:

- 1. To provide the highest quality customer service in partnership with government agencies, citizens, communities, and customers internal and external to Oakland County.
- 2. To provide leadership through the strategic use of technology.
- 3. To ensure executive support and commitment from County Executive, Board of Commissioners, and other elected officials.
- 4. To ensure all County agencies will be treated as equal and important partners of the IT Department.
- 5. To empower IT customers to become more self-sufficient and technologically confident.
- 6. To encourage county departments and local governments to use information technology to improve and deliver services.
- 7. To recruit and retain a technically competent workforce.
- 8. To develop, maintain, and distribute high-quality information in support of decision making and collaboration.
- 9. To effectively communicate with the customer community.
- 10. To promote shared services through cross boundary collaboration.
- 11. Embrace innovation in every aspect of government service.

3.0 IT MASTER PLAN STATUS

Every two years the Department of Information Technology prepares a 24-month Master Plan in cooperation with the Information Technology Leadership Groups. The Leadership Groups consist of representatives from the County's Departments and Divisions. The Master Plan details the projects that Information Technology will work on during the 24 months. Each project in the plan is reviewed for a number of criteria (including fit into the overall IT Strategic Plan) before being approved by the Leadership Groups and Information Technology. The current Master Plan was prepared in October 2018.

Within the IT Master Plan, hours are allocated across the following labor categories:

Non-Project: Time off, training, or administrative time such as departmental meetings, employee evaluations, budgeting, interviewing, etc.

Team Management: Time spent by IT Supervisors planning and scheduling work and resolving general team-related issues.

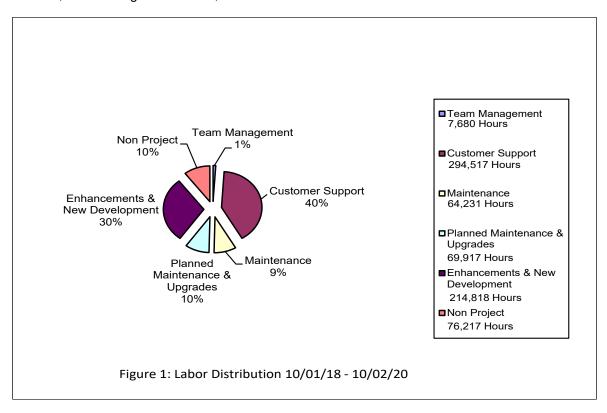

Customer Support: Preliminary or detail scope and approach, work order preparation, customer instruction and training, phone calls and e-mail response. Cross-training and system orientation.

Unscheduled System Maintenance: Activity required to rebuild or repair a system. Consists of changes made to software to fix errors and all hours associated with the resolution of Problem Reports. It also includes time investigating the problem prior to determining it is a bug.

Planned Maintenance & Upgrades: Planned or re-occurring activity in upgrading an existing software package to expand current capabilities, fix existing bugs, or in anticipation of future system problems, needs, or changes.

Enhancements/New Development: Construction of new systems, modifications to operational systems, and the identification, selection, and implementation of software packages.

The pie chart in Figure 1 demonstrates the distribution of IT Resources by Labor Category from October 01, 2018 through October 02, 2020.

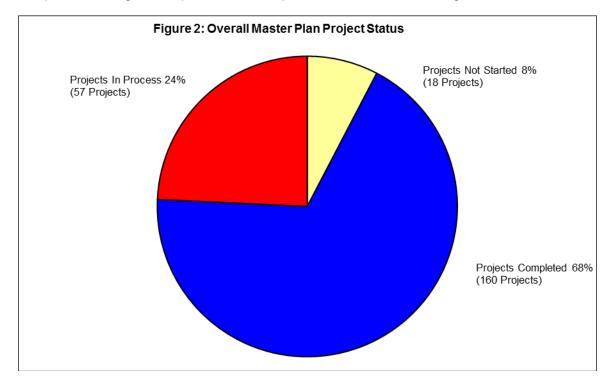

In the 2019/2020 Master Plan, IT planned for a 71% fixed labor delivery and 29% discretionary. Analysis of the fourth quarter of Fiscal Year 2020 reveals, 70% of IT's labor force was spent supporting and maintaining the County's current systems (including Customer Support, Maintenance, Planned Maintenance and Upgrades, Team Management and Non-project time). The remaining 30% of IT's labor force was spent implementing systems requested by various County Divisions through the IT Leadership Group Process.

4.0 PROJECT SUMMARY

There are a total of 235 Enhancement and New Development projects on the 2019/2020 Master Plan across the seven Leadership Groups. Of these projects, 160 are completed, 57 are In Process, and 18 are Not Started. As of October 02, 2020, 214,818 hours of IT labor have been expended on project-based work.

The pie chart in Figure 2 depicts the labor expended in each of these categories.

The remaining sections of this report provide a summary of the Enhancement and New Development projects broken down by Leadership Group.
