Project Goal

To create a public communications portal so that Public Information Officers can be identified quickly and vital communications can be distributed during an emergency and other risk events.

Business Objective

To source and implement a public communications portal to improve the efficiency of communications during emergencies and other risks and major events. The portal would include public information officers in local governments, non-governmental organizations, and major industry representatives (such as auto industry, health care, etc.).

Major Deliverables

- Create and execute an RFP
- Detailed Project Plan
- Application and/or System Requirements
- Technical Design Document
- Technical Architecture Diagram
- Training Plan
- User Acceptance Test Plan
- Implementation Plan
- Training/User Manual(s)
- Disaster Recovery Toolkit
- Service Center Knowledge Documents

Project Name: Public Information Officer Portal Project ID: DE3120PI

Approach

- Write the RFP
- Review RFP responses
- Request and attend demonstrations
- Select a vendor/implementor
- · Perform contract negotiations
- Develop Detailed Project Plan
- Review current business process and conduct needs assessment with customer, ensuring current manual processes are refined and automated.
- Document system requirements
- Determine and document system architecture and diagram
- Assess User Hardware and Software Requirements
- Conduct Tech Review
- Order hardware and software if needed
- Develop Implementation Plan
- Develop new system
- Develop User Acceptance Test Plan
- Test new system
- Acquire User Acceptance Sign off
- Conduct Change Control
- Develop User Documentation, SLA, Disaster Recovery Toolkit, Service Center Knowledge Documents
- Train users on new system
- Release new system into production

Research & Analysis
